Plaid, Inc.
1098 Harrison St,
San Francisco, CA 94103

Dear Hiring Manager,

My name is Tyler Maran. I am a full stack software engineer living in San Francisco. I have production level experience with nearly all the frameworks listed in the Plaid web tech stack, and would be happy to join the team.

Prior to working in software development, I was in a finance / investment management position for 3 years. Part of what inspired my shift to engineering was building better methods of collecting and presenting financial data. I serve as Treasurer for a 501(c)(3) non-profit organization, and have recently built a Node/React/Chart.js application for tracking cryptocurrency donations (live at my portfolio page).

I am reaching out regarding the Senior Engineer UI position, but I would appreciate your feedback on any positions that may be a good fit. For additional work experience, please refer to my portfolio page and attached resume.

Thank you for your consideration.

Sincerely,
Tyler Maran
